• Introduction

Have you ever thought about owning a piece of art by a famous artist, like a Picasso or a Van Gogh? Traditionally, such treasures have been out of reach for most people.

The global art market is estimated to be worth over **\$67 billion**, yet only a tiny fraction of the population participates.

Democratizing fine art as an asset class means making it possible for a wider range of people to invest in valuable artwork, not just the ultra-wealthy.

• Problem Statement

Art Market Challenges:

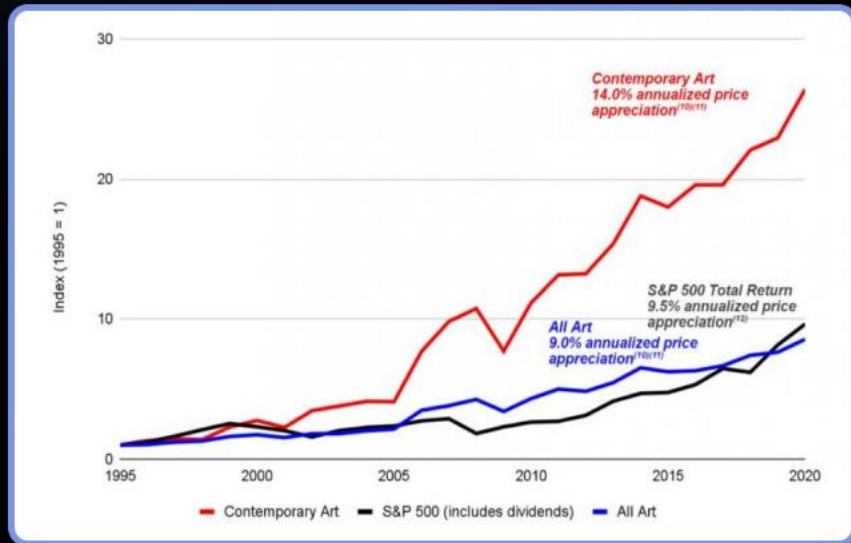

- **Inaccessible to average investors:** High entry costs stops mid-sized investors to participate into the market.
- **Illiquid market:** It's hard to sell quickly where the market is small and inaccessible.
- **Too complex:** Current market scenario needs to be simplified as the processes involved are too complex.

• Fine arts as an investment

From an art investment perspective, the fine art market exceeded the S&P 500's performance between January 2022 and July 2023, according to Artnet's Index for Fine Art. Fine art returns grew a nominal 4.2% against a 6.6% loss for the S&P 500 during the same period.

All assets gain and lose value at any point in time. According to a 2020 report by Citibank, art has one of the lowest correlations to the stock market of any major asset class.

Contemporary art: **14%** annual returns
S&P 500: 9.5% annual returns
All art: 9% annual returns

• What are NFTs?

NFTs (Non-Fungible Tokens) are unique digital objects that represent things like artwork, music, and even tweets. They're collected like trading cards or rare items because they're one-of-a-kind, and you can prove that you own them using blockchain technology. Think of it like a special, digital collectible that you can't find anywhere else.

Physical Asset/Collectible

Converted through blockchain
& Smart Contract

Digital Asset/Collectible

- Can be purchased with digital currency – Cryptocurrency
- Lives in your Crypto Wallet
- Cannot be exchanged – Unique
- Can be resold in NFT Marketplaces for a profit

• Solution

Interchange by Willem de Kooning

*People from different
socioeconomic diversity
with small/large cap
investment portfolios*

*Breaking down the painting
into multiple shares (tokens)
of low ticket price through
tokenization on blockchain*

Through a trading platform (user interface)

• Introducing, ArtPlus

ArtPlus

A platform to collect or invest into blue-chip art pieces with massive growth and ROI. Users can discover new art pieces and their artists and buy shares in the form of tokens.

- ✓ Discover bigger artist pool and art pieces
- ✓ Invest into blue-chip art pieces with low entry prices
- ✓ Monitor portfolio and ROI

- **Prototype Overview – ArtPlus**

The prototype adopts a decentralized architecture, utilizing a blockchain network to hold and manage Art NFTs. The architecture comprises smart contracts, a consensus mechanism for validating transactions, and an off-chain layer for user interfaces (website).

This is an Art NFT which contains a music file and a private community access.

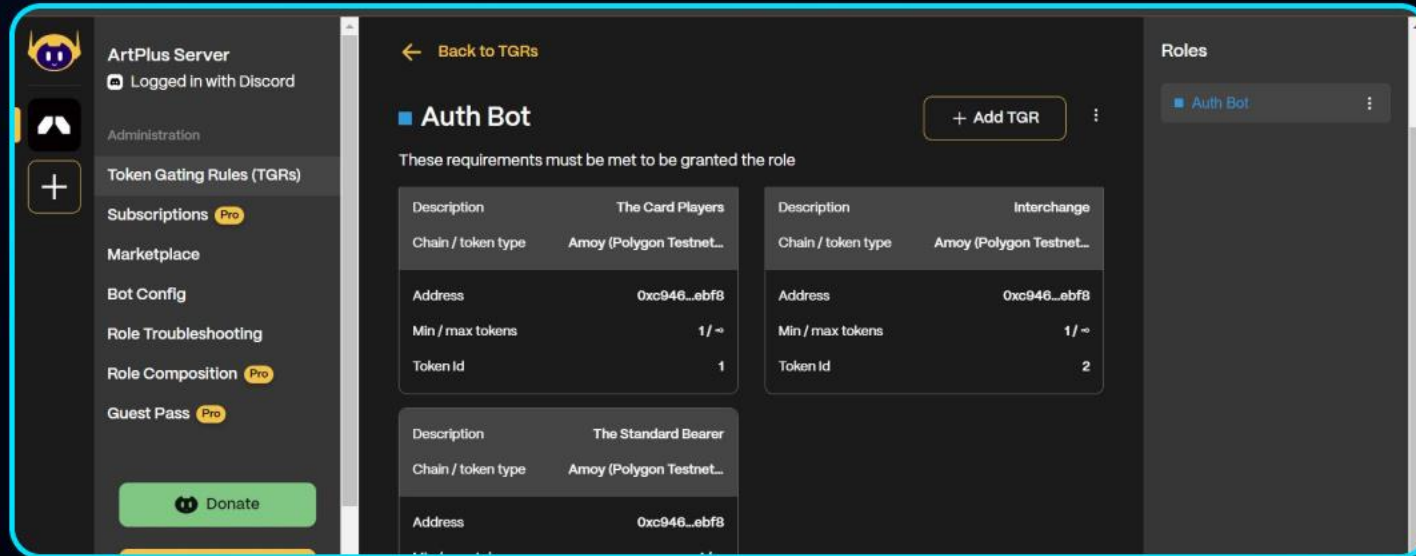

We've created ERC-1155 NFT contract (semi-fungible), on polygon Amoy testnet

This is Point of sale, from where we can connect our wallet and purchase NFT

This is AuthBot extension, where we can access private community channel. Only for Holders.

Thank You
